to make such repairs. However, the movement is subject to the further restrictions of §215.9 of this chapter.

[41 FR 18657, May 6, 1976, as amended at 41 FR 43153, Sept. 30, 1976]

## §216.13 Special notice for repairs—locomotive.

(a) When an FRA Motive Power and Equipment Inspector determines a locomotive is not safe to operate in the service to which it is put, whether by reason of nonconformity with the FRA Locomotive Inspection Regulations set forth in part 230 of this chapter or by reason of any other condition rendering the locomotive unsafe, he notifies the railroad in writing that the locomotive is not in serviceable condition. After receipt of the Special Notice, the railroad shall remove the locomotive from service until it is restored to serviceable condition. The locomotive may not be deemed to be in serviceable condition until it complies with all applicable requirements of part 230 of this chapter and until all additional deficiencies identified in the Special Notice have been corrected.

(b) The carrier shall notify the FRA Regional Director of Railroad Safety in writing when the locomotive is returned to service, specifying the repairs completed. The carrier officer or employee directly responsible for the repairs shall subscribe this writing under oath.

## §216.15 Special notice for repairs—track class.

(a) When an FRA Track Inspector or State Track Inspector determines that track does not comply with the requirements for the class at which the track is being operated, as defined in the Track Safety Standards (49 CFR part 213), he notifies the railroad in writing that the track is being lowered in class and that operations over that track must comply with the speed limitations prescribed in part 213 of this chapter. The notice describes the conditions requiring the track to be lowered in class, specifies the exact location of the affected track segment, and states the highest class and corresponding maximum speeds at which trains may be operated over that track. After receipt of such notice, the

speeds at which trains operate over that track shall not exceed the stated maximum permissible speeds, until such time as the track conforms to applicable standards for a higher class.

(b) The railroad shall notify the Regional Director in writing when the track is restored to a condition permitting operations at speeds authorized for a higher class, specifying the repairs completed.

[41 FR 43153, Sept. 30, 1976]

## §216.17 Appeals.

(a) Upon receipt of a Special Notice prescribed in §216.11, 216.13, or 216.15, a railroad may appeal the decision of the Inspector to the FRA Regional Director of Railroad Safety for the region in which the notice was given. The appeal shall be made by letter or telegram. The FRA Regional Director assigns an inspector, other than the inspector from whose decision the appeal is being taken, to reinspect the railroad freight car, locomotive, or track. The reinspection will be made immediately. If upon reinspection, the railroad freight car or locomotive is found to be in serviceable condition, or the track is found to comply with the requirements for the class at which it was previously operated by the railroad, the FRA Regional Director or his agent immediately notifies the railroad, whereupon the restrictions of the Special Notice cease to be effective. If on reinspection the decision of the original inspector is sustained, the FRA Regional Director notifies the railroad that the appeal has been denied.

(b) A railroad whose appeal to the FRA Regional Director for Railroad Safety has been denied may, within thirty (30) days from the denial, appeal to the Administrator. After affording an opportunity for informal oral hearing, the Administrator may affirm, set aside, or modify, in whole or in part, the action of the FRA Regional Director.

(c) The requirements of a Special Notices issued under this subpart shall remain in effect and be observed by railroads pending appeal to a Regional Director for Railroad Safety or to the Administrator.
